

# WALEED FAHAD ALANAZI

>> DATA SCIENTIST  
>> FULL-STACK DEVELOPER  
>> FLUTTER DEVELOPER  
>> FIREBASE EXPERT

## / ALL ABOUT ME

I'm a Data Science graduate from King Saud University.

I love programming, developing, building interesting things that make people's lives easier.

I love learning new things and expand my knowledge, teaching and helping others, lead a team and work as a group.

## / PERSONAL DETAILS

>> Riyadh, Saudi Arabia  
>> Birthday. 11 July 1996  
>> Bachelor in Data Science - King Saud University (second class honors).  
>> GPA. 4.69  
>> [Waleedf112@gmail.com](mailto:Waleedf112@gmail.com)  
>> [WaleedAlenazi.com](http://WaleedAlenazi.com)  
>> Mobile No. +966 54 343 8863

## / TOP PROGRAMMING SKILLS

> Flutter & Dart (since 2018)  
> Firebase (since 2018)  
> Node.js (since 2018)  
> SQL, NoSQL (since 2019)  
> Javascript, Typescript (since 2018)  
> Python (since 2020)

## / ADDITIONAL:

> RESTful APIs	> Java
> R	> C#
> Parse-platform	> NLP

## / EXPERIENCES & ACHIEVEMENTS

### >> Data Science - Computer Information Systems

Bachelor student at King Saud University, with a 4.69 GPA and a second class honors. ( 2016 - 2021 ).

### >> World Robot Olympiad

Advanced Team Competitor. (2019)

Participated in World Robot Olympiad Competition 2019 in Riyadh at Prince Faisal ibn Fahd Olympic Complex on behalf of General Computer Sciences Muzahmia.

### >> Google Developer Student Club Solution Challenge

Participated in Google Developer Student Club Solution Challenge 2020. Presented and worked on smart license plates using RFID technology that solves Saudi Arabia's traffic issue, and currently the project is under development as my graduation project

### >> Release Of "My University" App

Released "My University" app on both platforms Android/iOS with nearly 37,000 users (Jan 2019).

The app helps university students to build their lectures' weekly table before the start of each semester.

### >> Saudi Arabia's Smart License-Plates (SASL) System

Graduation project. (Apr 2021)

A complete system built using hardware (Raspberry Pi, RFID RC522 Chip Reader/Writer, and NTAG215 RFID Tags), and software (Firebase's Firestore, Cloud Functions, Flutter).

The project was completed successfully by the end of the semester, with an "A+" grade.

### >> Release Of "My Shunt" App

Released the app "My Shunt" on both platforms Android/iOS. (Apr 2021)  
Built an app as a freelancer for a Pediatric Neurologist, the app helps patients suffering from hydrocephalus to deal with the shunt systems.

### >> Contribution to "BusinessGo"

Contributed to the award-winning app "BusinessGo" on both platforms Android/iOS. (May 2021)

Worked internally with the BusinessGo team during development on bug fixes, testing, and giving insight into using Flutter Framework and Firebase services.

[@business\\_go](https://twitter.com/business_go) on Twitter

### >> Fullstack Mobile App Developer at the Ministry of Education (MOE).

Currently working on a project at MOE in Saudi Arabia as a front-end developer using Flutter and Dart, and a back-end developer using Parse-platform server. (Feb 2022 - currently).

## / OTHER COMPUTER SKILLS

> Hardware troubleshooting	> Basic network penetration
> Git	> Linux
> Social engineering	> Passwords, hashes, keys penetration
> Microsoft office	> Network packets monitoring and security
> Video editing	> Overclocking, benchmarking pc hardware
> Photoshop	> PC building
> UI and UX design	> Software troubleshooting

## / PERSONAL SKILLS AND COMPETENCIES

> Native Arabic	> Determination and persistence
> Advanced English	> Eager to expand knowledge and skills
> Teaching and coaching	> Problem solving
> Adaptability and flexibility	> Creativity
> Positive attitude and energy	> Teamwork
	> Communication skills
